[8:36 PM] Linda Powell (Guest)

Pranita that was what I was trying to talk about and it brings other pollutants including carcinogens in with it...

[8:36 PM] Janice Ludden (Guest)

It is passed 8:30 and I have to leave the meeting. I will send an email with my questions. I have many objections to this project. I look forward to your reply to my email.

[8:37 PM] Pranita Bijlani (Guest)

I spoke to dozens of people in Keasbey in Spanish who have strong feelings and deserve to know about what is proposed in their own community. That is the spirit of the EJ law.

[8:38 PM] Pranita Bijlani (Guest)

And have a voice!!

[8:38 PM] pascale montgomery (Guest)

UC Berkeley student here researching this project, particularly the health impacts and environmental justice concerns of building this new power plant. If anyone here is willing to share any scientific literature or personal anecdotes pertaining to this project, feel free to email me pmontgomery@berkeley.edu.

[8:42 PM] Carol Dobos

What must the Governor be thinking about this Keasby plant? At a recent radio interview, he defended a similar plant that is proposed for Newark's Ironbound section, which is already overburdened with pollutants. He said that the Ironbound area needed a additional energy plant due to the climate catastrophe that occurred from Sandy.

So he is a proponent of adding to climate change by building another dirty plant in a highly polluted

area, which is also an environmental justice area.

[8:48 PM] Rachel Dawn Davis (she/her) Waterspirit (Guest)

There is no way 9PM will afford all speakers an opportunity to be heard. NJDEP must require another hearing and CPV invest in translation services.

[8:51 PM] Elizabeth Ndoye (Guest)

Outstanding Charlie! thank you!

[8:52 PM] Rachel Dawn Davis (she/her) Waterspirit (Guest)

Yes it is! Pure insanity.

[8:52 PM] Audra Sbarra

TY Charlie for your leadership and courage and tireless work

[8:52 PM] Chris Nowell he/him (Guest)

Yeah, Charlie!

[8:52 PM] Linda Powell (Guest)

Yay Charlie!

[8:53 PM] Chris Nowell he/him (Guest)

Withdraw!

[8:53 PM] Elizabeth Ndoye (Guest)

Stop the permits!

[8:54 PM] Linda Powell (Guest)

Thsnk you David!

[8:54 PM] Noémi Giszpenc

I have to go, but I stand with the people of Woodbridge against building this polluting power plant.
Goodnight!

[8:56 PM] Linda Powell (Guest)

Yes even the regulations are not good enough to keep us safe!!

[8:59 PM] Pranita Bijlani (Guest)

AO 2021-25 states that public hearings should be conducted "so as to maximize public participation." No one should be cut off or not allowed to speak.

[9:00 PM] Linda Powell (Guest)

People who live near the proposed plant do not even know about it!!

[9:00 PM] Linda Powell (Guest)

Thanks Rachel!

[9:01 PM] Margaret Ortiz (Guest)

I was not called on to speak but I OPPOSE this polluting fossil gas plant that is bad for the climate and terrible for this community! We all deserve the right to clean air and water. - Margaret Ortiz
Chapter Co-Chair Greater New Jersey Gateway Climate Reality Project.

[9:02 PM] Margaret Ortiz (Guest)

Ill sure be submitted a written comment as well!

[9:03 PM] Pranita Bijlani (Guest)

Administrative Order 2021-25 states that the DEP strongly encourages each applicant to engage directly with individuals in the overburdened community in advance of and in addition to formal public comment including providing relevant information related to facility-wide impacts. There should be additional hearings.

[9:07 PM] David Pringle, Clean Water Action / Empower NJ

I repeat for late entrees.... This hearing should already be over if you mean what you say on the first slide: "Responsible energy starts with us". Citing a massive gas plant that emits too many greenhouse gases and co-pollutants in an overburdened community as this proposal does is a poster child for irresponsible!
